

## DIS ART STUDENTS GO GREEN!

Fifth grade students at Durham Intermediate School used their artistic talents to promote conservation and “going green.” Each art student designed a campaign button to wear during the week of March 23-27 when Carroll ISD will celebrate Growing Green Graduates in correlation to Texas Public Schools week. The class discussed many ways we each can make an effort to help the environment. Then students used National Geographic and other magazines, along with their own drawing skills, to create an original button. The result was a fun, creative, and meaningful art making experience.
